

FOR IMMEDIATE RELEASE

Beyond Belief Invites Readers to Explore What Becomes Possible When Believability Expands

Anael Ivon's newly released book reframes belief as something that can become more available through familiarity, awareness, permission, trust, and receiving.

OREGON, August 31, 2026 —

Author and spiritual guide Anael Ivon has released *Beyond Belief: Entering the Field of Believability*, a contemplative new book built around a central premise: **believability is not fixed**.

Rather than asking readers to force themselves to believe something they do not yet believe, *Beyond Belief* explores what happens when possibility is approached through awareness, familiarity, permission, trust, and receiving. The book asks readers to notice the difference between something being theoretically possible and something becoming believable enough to receive.

One of the book's recurring ideas, **Familiarity Is Not Proof**, examines how what feels familiar can quietly shape expectations, choices, and what people consider possible, and what can open when something previously considered impossible begins to feel believable.

Structured as a journey through thresholds and sanctuary spaces, *Beyond Belief* is designed to be experienced as well as read. Its reflective format creates room for readers to notice their own responses rather than being told what they should believe.

Beyond Belief: Entering the Field of Believability is now available on Amazon and through Anael Ivon's official book page.

"The invitation is not to force a new belief. It is to notice what becomes available when the boundary of what feels believable begins to expand." — Anael Ivon

ABOUT ANAEEL IVON

Anael Ivon is an author, spiritual guide, and International Board Certified Clinical Hypnotherapist. Her work explores awareness, consciousness, nervous-system and somatic experience, believability, receiving, and personal transformation. She is also creator and host of the *Open to Receive* podcast and founder of Incorruptible High Light™.
